

## U.S. RE-ENTRY SELF-TEST KIT USER GUIDE

### How does it work?

1. Guests will register directly on [Inspire Diagnostics' website](#). Test kits are USD \$45 per person, paid directly to Inspire with credit card. Test kits are shipped from Inspire directly to the guest prior to their departure and will arrive within 5 business days from the time of ordering. The guest must bring their test kit with them on tour.
2. Before departure, participating guests will register for a virtual appointment timeslot through the Inspire app or on Inspire's website. Timeslots will be available in local time in their destination, so that guests don't have to calculate the time change.
3. The testing appointment will take place over Zoom or another virtual conferencing app prior to the end of their tour. Guests must have a smartphone or laptop with them on tour to conduct the virtual appointment.
4. At the scheduled time, guests will join their virtual appointment. They will perform a nasal swab in real-time in the virtual presence of the Inspire healthcare provider and place their swab into their test kit, which will indicate the results of their test.
5. Once the result is known as negative, the Inspire healthcare provider will issue the guest with a certificate of a negative COVID-19 result through the Inspire app within 60 minutes of their test. This certificate meets the requirement for re-entry into the United States.

### How do I sign up?

Register and purchase a test kit directly on [Inspire Diagnostics' website](#).

***You should order your test kit at least 10 business days prior to your international departure to allow for delivery time.***
